"Screening Hearts, Saving Lives"

www.safebeat.org

DUVAL COUNTY
PUBLIC SCHOOLS

Coming **SOON** to
YOUR school...

Protect your child today!

The Facts:

- ◆ Approximately 80% of sudden cardiac deaths in youth did not have a prior symptom... their first symptom was death.
- ◆ Standard physicals do NOT replace preventative heart screenings.
- ◆ Each year, approximately 7,000 children (ages 6 -18) needlessly die from SCA. **SafeBeat** preventative heart screenings can help reduce the occurrences of these types of deaths.

PREVENTATIVE HEART SCREENING COMPONENTS

- Screenings are provided in collaboration with Wolfson Children's Hospital.
- Screenings consist of:
 - Heart health questionnaire
 - Bilateral blood pressures (BP),
 - Height/weight (BMI)
 - 12-Lead electrocardiogram (ECG/EKG)
- All screenings are reviewed by a board-certified pediatric cardiologist.
- Screenings do not include an echocardiogram.

Please note: If results recommend follow-up with a pediatric cardiologist, your child's primary care physician should be contacted to provide such referral.
