{School Logo Here}

Coming **SOON** to  
**YOUR** school...

**Protect your child today!**

**The Facts:**

- ◆ Approximately 80% of sudden cardiac death in youth did not have a prior symptom... their first symptom was death.
- ◆ Standard physicals do NOT replace preventative heart screenings.
- ◆ Each year, approximately 7,000 children (ages 6 -18) needlessly die from SCA. **SafeBeat** preventative heart screenings can help prevent these deaths from occurring.

# Is your child safe?

**SafeBeat** is a 501c3 foundation with a mission to “Screen Hearts, Save Lives” and create a healthier generation! Thanks to the compassion and generosity of Leon County Schools, Tallahassee Memorial Hospital & Wolfson Children’s Hospital, **SafeBeat** is able to bring its life-saving program directly to your child’s school.

**Sign-up today!**

**When:**
